1982

STATISTICS ON OCCUPATIONAL SUPPLY-DEMAND
ST. LOUIS, MISSOURI - EAST ST. LOUIS, ILLINOIS

This Document Is Issued as a
Supplement to The Occupational Data Book
Prepared by The Missouri Occupational
Information Coordinating Committee

January 1982

STATISTICS ON OCCUPATIONAL SUPPLY-DEMAND

ST. LOUIS, MISSOURI - EAST ST. LOUIS, ILLINOIS

This set of supply/demand analysis clusters is provided as a supplement to the statewide publication, Statistics on Occupational Supply-Demand: Missouri. Potential users of these statistics should have studied the introductory materials in the statewide publication and should use these clusters together with the analysis presented for the statewide clusters.

The statewide supply-demand report is presented along with the Kansas City SMSA and the St. Louis SMSA reports in the Occupational Data Book prepared by the MOICC. The St. Louis SMSA report includes statistics on current employment, projected employment, and average annual openings, developed by the Division of Employment Security for the St. Louis SMSA (Standard Metropolitan Statistical Area). The SMSA includes the following counties: Franklin, Jefferson, St. Charles, St. Louis County, and St. Louis City in Missouri; Clinton, Madison, Monroe, and St. Clair in Illinois. The St. Louis SMSA report also includes program completion data for education/training programs offered in this nine county area.

The supply/demand clusters included in this report, however, are prepared for data users who are interested in examining occupational program completions from Missouri and Illinois institutions separately. This report gives the completion data for Missouri and Illinois on separate pages of the same cluster. For example, if you turn to cluster 0110, Radiologic Technology (all levels), in the St. Louis SMSA report you will find that 70 persons completed programs of study for this occupation from institutions within the SMSA. In this report when you turn to the cluster 0110 designated as "SMSA: (01) St. Louis, Missouri", (upper left corner of cluster), you will find that 51 of the 70 persons completed programs from institutions located within the Missouri portion of the SMSA. Cluster 0110 designated as "SMSA: (08) E. St. Louis, Illinois" shows that 19 persons completed programs from institutions located in the Illinois portion of the SMSA. All clusters are in pairs so that cluster 0110 for Missouri is followed by cluster 0110 for Illinois.

There is currently no method of separating the demand data into Missouri and Illinois portions, so demand figures for the entire SMSA are repeated in the Missouri and Illinois clusters. This repetition of the same demand data is provided only as a frame of reference. When only demand data is shown in a cluster, this indicates that no completions for this occupational area were shown from institutions within the geographic area covered.

It is recommended that planners of occupational programs for the St. Louis area use the St. Louis SMSA report from the Occupational Data Book in analyzing the supply and demand for labor and that this set of clusters only be used to examine the relative supply of occupational completors from the Missouri and Illinois portions of the SMSA.

Since all the sub-state cluster numbers are the same as the statewide clusters, the indexes for the Occupational Data Book may be utilized for ease in finding particular clusters, occupations, or programs.

If the reader has questions about data presented in this report or about appropriate uses of the data, please contact the MOICC office for assistance:
